PROTECTSMARTER

SOLAR-POWERED, WIRELESS & RELIABLE - No wiring needed. Battery backup ensures non-stop coverage, even off-grid.

RUGGED ALL-WEATHER BUILT - No wiring needed. Battery backup ensures non-stop coverage, even off-grid.

NATIONWIDE RAPID DEPLOYMENT - Delivered & fully operational in as little as 20 minutes.

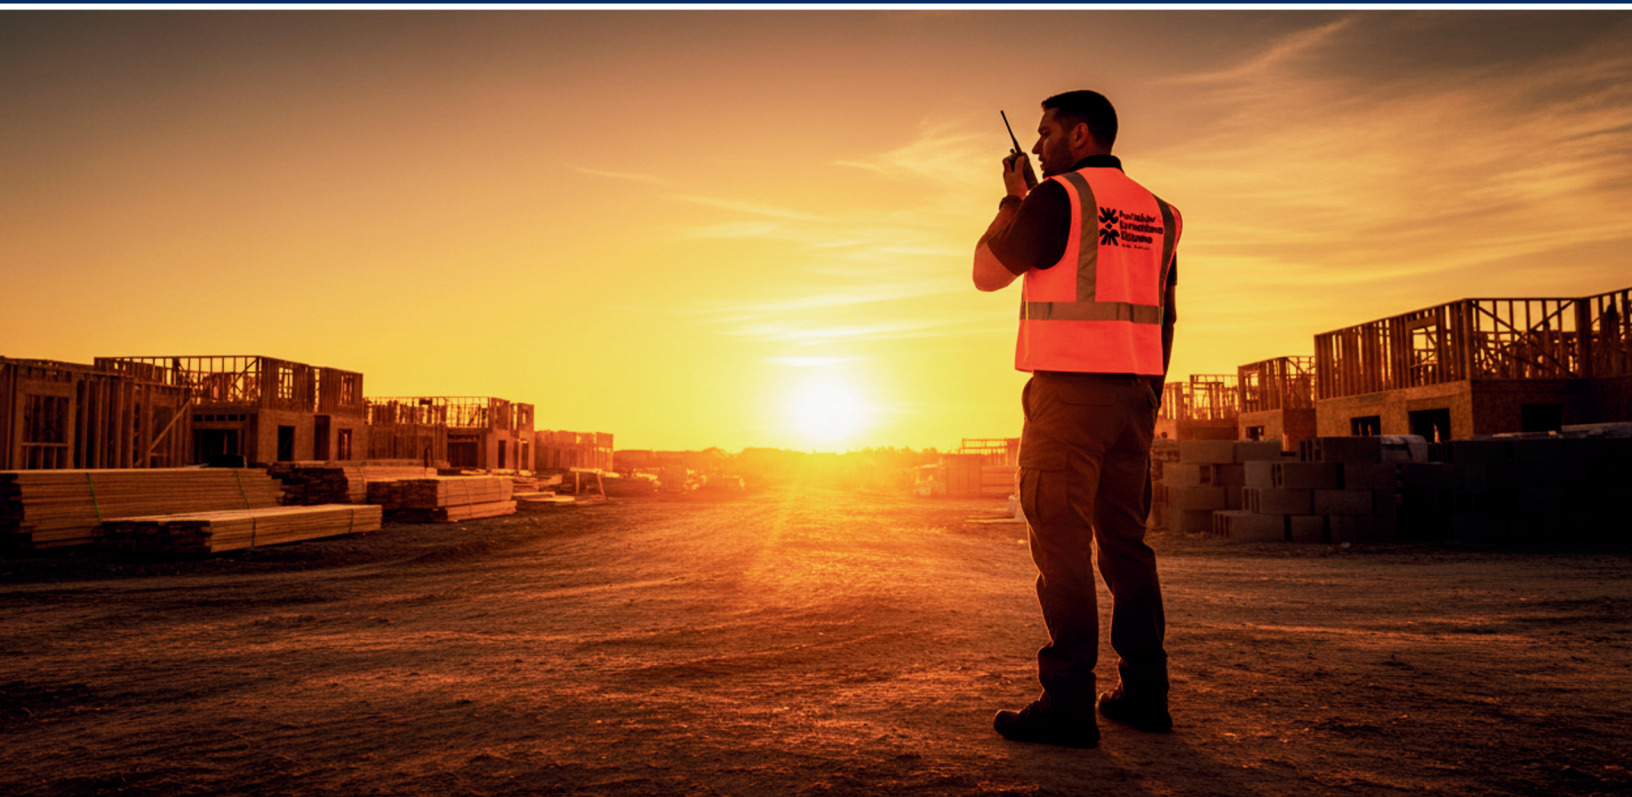

CLOUD ACCESS ANYWHERE - Check live feeds & recording anytime & anywhere via web, iOS, or Android devices.

LIVE GUARD MONITORING - Trained licensed professionals watch your camera 24/7, speak to intruders, trigger alarms & call authorities instantly. Based on your needs, we also have In-Person certified security guards available upon request.

HYBRID SECURITY

OUR LIVE RESPONSE - From Detection to Deterrence in Seconds.

Security is an active process, not a passive recording. Our Live Response is the core of the PSS Onsite advantage. The moment our 360 Ultra HD Cameras and AI Threat Detection identify suspicious activity, our licensed professionals take over from our monitoring center. They use the unit's Two-Way Audio to verbally confront intruders and activate flashing deterrent lights, making it clear they are watched. This immediate, human intervention—backed by the option of deploying In-Person Security Guards—dramatically reduces loss, turning a potential theft into a decisive, successful intervention. We deliver a rapid, effective security solution that is MADE IN USA.

SOME PRODUCT OPTIONS

Guardian M4 & M2

Compact, solar-powered mobile units designed for quick deployment and versatile coverage. Perfect for medium-sized job sites or temporary surveillance zones needing 24/7 live monitoring and AI detection.

Guardian HAWK

Heavy-duty surveillance trailer with elevated mast cameras, AI analytics, and remote monitoring. Ideal for large construction or commercial sites requiring high-visibility deterrence and full perimeter protection.

Guardian POLE

Smart standalone pole system powered by solar energy, integrating multiple cameras for smaller or fixed locations. A cost-effective solution for ongoing site protection and rapid setup.

AI DETECTION + Human Response In One Solution

When it comes to protecting your property, we go beyond traditional surveillance. Our next-generation mobile security units deliver 24/7 protection powered by real guards + advanced technology. Fast to deploy, built to last, and proven to perform!

Testimonial

Ryan C.
Superintendent,
TriPointe Homes

“From Break-Ins to Peace of Mind — How TriPointe Homes Secured Their Jobsite with PSS Onsite

Before PSS Onsite:

At a high-profile residential development in Brentwood, TriPointe Homes was facing persistent after-hours trespassing, stolen copper wiring, and liability concerns from jobsite vandalism. Standard fencing and floodlights weren’t deterring theft — and local police response times were too slow to stop incidents in progress.

After PSS Onsite:

Within 24 hours, PSS deployed AI-powered mobile surveillance trailers with 360° thermal cameras and real-time alerts. Our live monitoring team intercepted the first attempted intrusion on Night 2, deterring the suspect via loudspeaker and alerting site management instantly. Over the next 60 days, incidents dropped to zero. TriPointe not only avoided over \$18,000 in potential losses but also gained a new layer of site visibility and risk reduction.

“We saw an immediate difference. PSS became our eyes after hours — and the crew felt safer too.”
